PROFESSIONAL SUMMARY

Aspiring Software Engineer with strong hands-on experience building full-stack web applications. Skilled in designing scalable systems, managing databases, and developing user-focused solutions. Built multiple real-world projects including a School Management System and Job Portal, demonstrating problem-solving and system architecture skills.

TECHNICAL SKILLS

Languages: JavaScript, HTML, CSS

Frameworks: React (Basic)

Backend: Node.js (Basic), REST APIs

Database: PostgreSQL, Prisma ORM

Concepts: System Design, Database Relationships, CRUD Operations

PROJECT EXPERIENCE

School Management System

- Designed and implemented a role-based system for Admin, Teachers, and Parents.
- Managed student records, attendance tracking, and result processing.
- Designed relational database schema improving data organization and access efficiency.
- Built features for fee tracking and teacher management.

Job Portal System

- Developed a platform enabling job seekers to apply and employers to post jobs.
- Implemented many-to-many relationships for job applications.
- Built structured backend logic for application tracking and user roles.
- Focused on scalable architecture and clean data flow.

EDUCATION

(Add your University/College Name)

Field of Study: (e.g., Computer Science)

Expected Graduation: (Year)
